

PB#931

**This document is necessary to know the instructions for executing the python scripts provided in the folder.

- The user must have *imutils* package installed beforehand.

*To install imutils (using pip),

```
pi@raspberrypi:~ $ pip install imutils
```

- The file task4-main.py must be executed in the terminal along with some *arguments* that must be passed to access the PiCamera.

SYNTAX :

```
pi@raspberrypi:~ $ python task4-main.py --picamera 1
```

*Note : There are two “ - ” before “ picamera ”.
